

LONG-COVID: TREATMENT OPTIONS FOR THOSE AFFECTED

WHAT WE OFFER

Symptoms can occur over a longer period of time following infection with SARS-CoV-2. These are to be seen as a consequence of the viral disease once the actual viral infection has already subsided.

Our «PK Tel» partner Zurzach Care offers a unique range of Long-COVID treatments throughout Switzerland. At various locations in German-speaking Switzerland, the centres offer interdisciplinary assessment, as well as treatment if the corresponding symptoms are present. The offer has the unique advantage that various specialist areas (including sleep medicine, psychiatry, therapeutic facilities) are all available under one roof. This ensures the exchange of information and cooperation between the disciplines at all times, and allows for a holistic approach to patient treatment.

ENTITLEMENT

Your pension fund's prevention package with PK Rück provides you with priority access to this offer. Managers and HR officers can contact «PK Tel» at any time in the event of suspected cases of Long-COVID, and will receive detailed information on the programme, as well as support with questions on how to proceed.

REACHABILITY

«PK Tel» can be reached with questions about prevention, inability to work or other special situations within the company on

043 268 27 77 (fixed line rate)

Monday to Friday:
